

Scholarships for BCS Students

Two Laptop Scholarships for BCS Students from past BCSHons graduates

The students who followed and successfully completed the Bachelor of Computer Science (Special) degree program and currently they are working in the leading software companies collectively offered two brand-new laptops for BCS first year students (SC/2020 batch) who are very keen on education but cannot afford to purchase a laptop.

Ceremonial handover of the laptop was taken place in the Department of Computer Science from the Head of the Department, Professor W. A. Indika, academic members of the department, and two BCSHons graduates.
